PROFESSIONAL PROFILE

Enthusiastic and determined aspiring Full Stack Developer with a comprehensive skill set spanning both backend and frontend technologies. Well-versed in backend tools such as NodeJS, MongoDB, Sequelize, Express, and JWT and more, while also demonstrating proficiency in frontend technologies including React, Redux, NextJS, Tailwind CSS, TypeScript. Eager to leverage academic knowledge and self-taught skills in a professional setting, contributing to dynamic development projects and expanding proficiency across the full stack. Committed to delivering efficient, secure, and scalable web solutions that elevate user experiences.

EMPLOYMENT HISTORY

Jun 2023 — Aug 2023

Full Stack Developer, CEIBO DIGITAL

Remote

Collaborated within a cohesive team of skilled developers to conceptualize, design, and implement a cutting-edge news management application. The application serves as a pivotal tool for streamlining information exchange among company members, effectively enhancing project visibility and coordination across diverse client projects. The project was executed with meticulous attention to detail, adhering to varying user hierarchies and role-based access, fostering optimal usability and security.

Key Accomplishments:

- Orchestrated the creation of comprehensive database tables, optimizing data storage and retrieval processes for seamless application performance. Implemented efficient database connectivity, ensuring real-time data synchronization and consistent user experience.
- Established a robust routing system to ensure fluid navigation and smooth interaction within the application. Actively managed and maintained controllers, utilizing best practices to enhance code modularity and maintainability.
- Designed and developed frontend components that facilitated intuitive user interactions and a cohesive visual experience. Ensured cross-browser compatibility and responsiveness, enhancing usability across diverse devices.
- Employed Redux to manage application state, maintaining a consistent and centralized data repository across various components. Optimized data flow, reducing unnecessary re-rendering and enhancing overall application responsiveness.
- Collaborated closely with the development team to identify challenges, brainstorm solutions, and share insights to ensure smooth project progression. Actively participated in code reviews, contributing constructive feedback and adhering to coding standards to maintain code quality.

TRAINING

May 2023 — Aug 2023

Full Stack Developer, Plataforma 5

Remote

Platform 5 is an elite, intensive training program meticulously designed to elevate aspiring developers into industry-ready professionals. With a focus on honing soft skills through immersive simulations of real-world work scenarios and acquiring advanced technical expertise, the program offers an unparalleled opportunity for career transformation.

SKILLS

NodeJS	React
Express	NextJS
MongoDB	Redux
JWT	TypeScript
SQL	Tailwind CSS
Sequelize	Git
JavaScript
