Full Stack Developer with over 1 year of experience, specializing in both frontend and backend development. I have worked on prominent projects using cutting-edge technologies such as NodeJS, Express, React, NextJS, MongoDB, and Tailwind CSS. My logical and meticulous approach is reflected in the quality of the applications I develop.

I am a committed professional with a focus on continuous learning, easily adapting to new work environments. My advanced skills in NodeJS, Express, React, NextJS, MongoDB, and Tailwind CSS are complemented by a strong understanding of HTML, CSS, and JavaScript.

In addition to my technical expertise, I possess soft skills such as teamwork, effective communication, and problem-solving. I have contributed to the success of previous projects by improving processes and providing innovative solutions.

Eager to apply my experience and passion for web development to deliver value and quality.

WORK EXPERIENCE

Full Stack Developer Intern
CEIBO DIGITAL, Remote

Jun 2023 - Aug 2023

At **CEIBO DIGITAL**, a business specializing in designing and implementing digital transformations, I had the opportunity to collaboratively develop a pivotal project for managing updates in projects, involving users with varying hierarchical roles within the company. This project also included the capability to send progress updates and notifications to project partners.

Key achievements during my internship include:

- **User Hierarchy and Security:** Led and successfully implemented a user hierarchy within the application, ensuring route protection and tailoring each graphical interface to the specific needs of each user. This approach made the application navigable, intuitive, and 100% functional.
- **Frontend Development and Usability:** Established a robust routing system to ensure smooth navigation and seamless interaction. Designed and developed frontend components that significantly enhanced user interactions and provided a consistent visual experience. Ensured compatibility and responsiveness across browsers, improving usability on various devices.
- **State Management and Database:** Efficiently managed the application state, maintaining a consistent and centralized data repository across multiple components. Orchestrated the creation of comprehensive database tables, optimizing data storage and retrieval processes for optimal application performance.
- **Code Reviews and Workplace Improvement:** Led code reviews, provided constructive feedback, and ensured adherence to best practices. Meticulously supervised compliance with best practices, making the application scalable. My focus on effective communication and active listening resulted in agreements and coding guidelines that improved the work environment.
- **Agile SCRUM Methodology:** Managed the project using the Agile SCRUM methodology, effectively adapting to changing project requirements and demands.

Key Technologies Used: NodeJS, JavaScript, Vite + React, Redux, Framer-Motion, MongoDB, Express, Mongoose, JWT, bcrypt.

1. Interactive Dashboard: Developed an interactive dashboard using Vite + React, Material-UI, Nivo, and FullCalendar. This project involved implementing cutting-edge technologies to ensure a dynamic and functional user experience.
2. Delivery App Frontend: Led the development of the frontend for a delivery application using NextJS, TypeScript, Tailwind, and Framer-Motion. I emphasize the creation and adaptation of SVG to enhance the aesthetics and interactivity of the application.
3. Ongoing E-commerce Project: Currently working on an exciting e-commerce project with NextJS, TypeScript, Firebase, Tailwind, and Three.js. This project focuses on creating an immersive and engaging online shopping experience, leveraging the latest technologies to ensure optimal performance and an intuitive user interface.

EDUCATION

Full Stack Developer
Plataforma 5, Remote

May 2023 - Sep 2023

Plataforma 5 is an elite, meticulously designed, intensive training program aimed at transforming aspiring developers into industry-ready professionals. With a focus on refining interpersonal skills through immersive simulations of real-world work scenarios and acquiring advanced technical expertise, the program provides an unparalleled opportunity for professional transformation.

Balchiller Ciencias Naturales
Domingo Faustino Sarmiento, Ayacucho

Mar 2016 - Dec 2019

SKILLS

TypeScript
JavaScript
NodeJS
Express
SQL
MongoDB
Sequelize
JWT
React
Redux
NextJS
TailwindCSS
AWS Amplify
Firebase
Git Flow
Git
